ANTONIO GUERRASIO | COMPANY PROFILE 2019/01

*The philosophy of Antonio Guerrasio S.r.l., the company that has been putting its experience at the service of architecture for over 50 years, was born from the meeting of history, craft tradition and advanced technology.*

*A philosophy summarised in the company vision:*  
***technology & ideas for architecture.***

With three production sites, strategically located in northern, central and southern Italy, the production includes, starting from sheet metal coils, the cold working of the sheet by master carpenters, with the support of systems and numerical control machines for bending, pressing, laser cutting and powder coating.

Through constant research and development, Antonio Guerrasio S.r.l. produces metal profiles and systems for the sector of technical interior finishes, metal ceiling systems integrated in panels, slats or gratings for civil and religious buildings, for naval furnishings, for the hospital and penitentiary sectors; it also produces ceiling lights and airtight diffusers, patented flexible metal profiles (with the VERTEBRA® brand), road sound barriers and a wide range of completing accessories. And, besides the standardized productions, what makes Antonio Guerrasio S.r.l. unique is the ability to respond to the particular needs of professionals and companies with ad hoc solutions designed for the individual construction site, being able to engineer any architectural proposal thanks to the team of specialized technicians who work in synergy with the designers.

Thanks to the new patents and the prizes won over time, today the solid reputation acquired over the years ensures the presence of Antonio Guerrasio products in the most important architectural works, such as in the Guggenheim Museum in Bilbao of the architect Frank O. Gehry, symbol of contemporary architecture.
