

PERIMETER PROFILES

PDL Perimeter profile

The perimeter finish that is created with the PDL profile is a nice beading effect between the wall and the false ceiling, giving to the room a greater depth.

Material	Steel / Aluminium			
Thickness	0,4 / 0,5 mm			
Sizes	A	B	C	D
	19	11	14	19

PPL Perimeter profile

The PPL perimeter profile is a simple perimeter finish for panel support and it is not recommended for large format panels.

Material	Steel / Aluminium	
Thickness	0,4 / 0,5 mm	
Sizes	A	B
	24	24
	30	30

PPC Perimeter profile

The proposed solution consists of two C-profiles that create pressure between them on the cut panel.
For both internal and external false ceilings.

Material	Steel / Aluminium		
Thickness	0,4 / 0,5 mm		
Sizes	A	B	C
	20	20	20
	25	20	20
	40	24	24

PPF Perimeter profile

The PPF profile is mainly used for the junctions between the horizontal plane false ceiling and a plasterboard panel, avoiding the grouting of the joint.

Material	Steel / Aluminium			
Thickness	0,4 / 0,5 mm			
Sizes	A	B	C	D
	33	13	15	34
	30	16	15	37
	26	18	15	40
