

SPACECRAFT

floating system with **Vert Occulto** tiles

90° edge

beveled edge

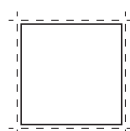

DESCRIPTION

Spacecraft is an indoor floating ceiling system characterised by a perimeter band that defines a rectangular, square or curved shape. Inside, tiles from the Vert Occulto series can be installed in either a square or rectangular shape, with a right or bevelled edge. The panels can be made of steel or aluminium, smooth or perforated, or of stretched metal. All elements can have different colours, wood-like effects or customised patterns. The versatility of the system defines its shape, but it is also possible to give the room acoustic comfort by perforating the panels and applying TNT sheets, polyester mats or rock wool on the back. Spacecraft can be fitted with plenum panels, and integrated lighting fixtures, keeping the same finish as the ceiling.

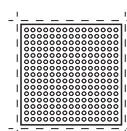

TECHNICAL FEATURES

Ceiling module:	Square / rectangular / curved
Tile material	Aluminium (Alloy 3000H46) Pre-painted steel Stainless steel
Tile colour:	Pre-painted DONN-WHITE Silver Post-painted RAL-NCS-Sublimed
Perimeter band colour:	Post-painted RAL-NCS folder
Standard thickness:	0,4 - 0,5 - 0,6 mm
Tile module:	300x300 mm 90° or bevelled edge 600x600 mm 90° or bevelled edge 300x1200 mm 90° or bevelled edge 600x1200 mm 90° or bevelled edge

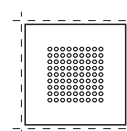

FINISH

Smooth tile

Perforated tile with
10 mm smooth edge

Perforated tile with
100 mm smooth edge

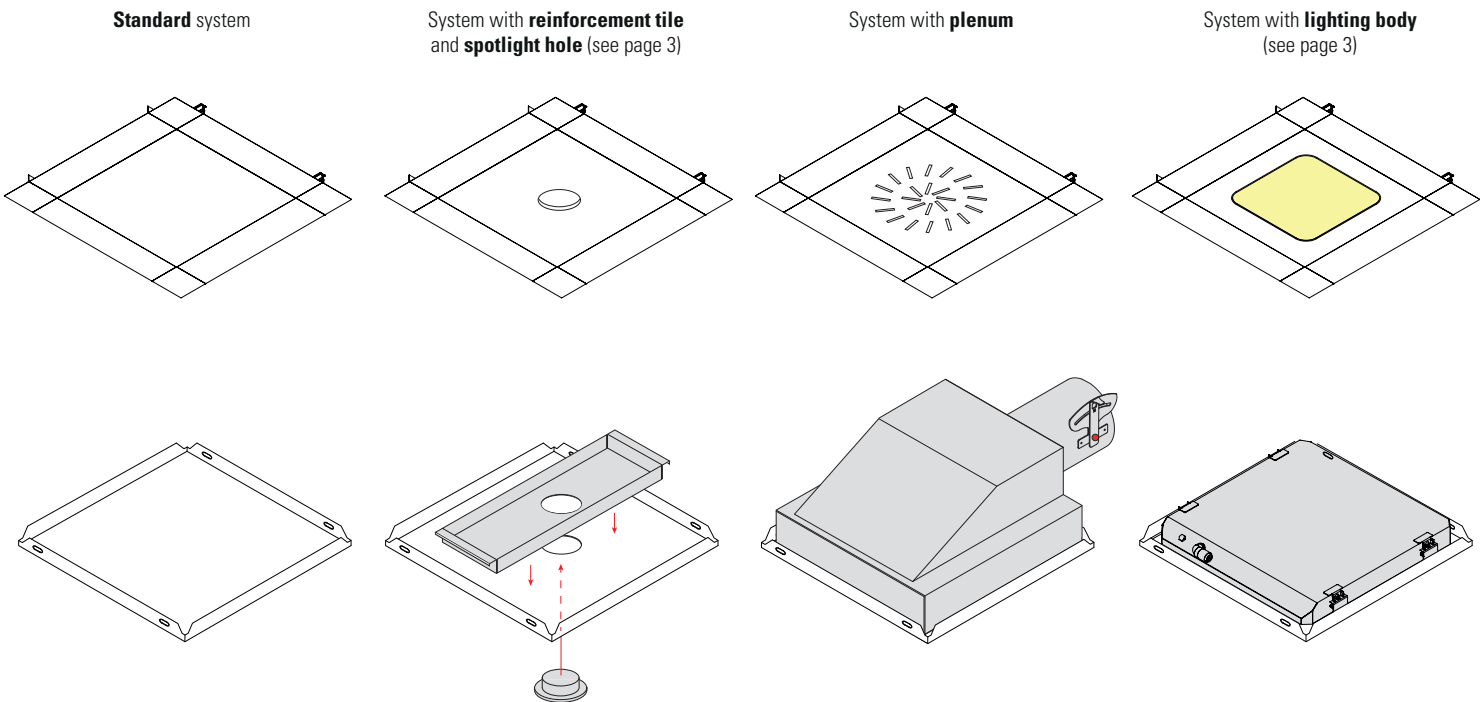

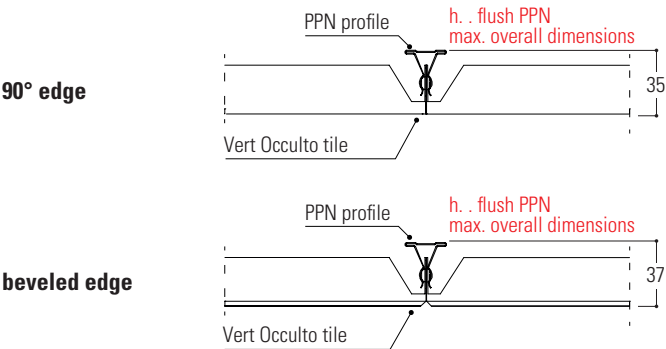

Wood-effect
sublimation

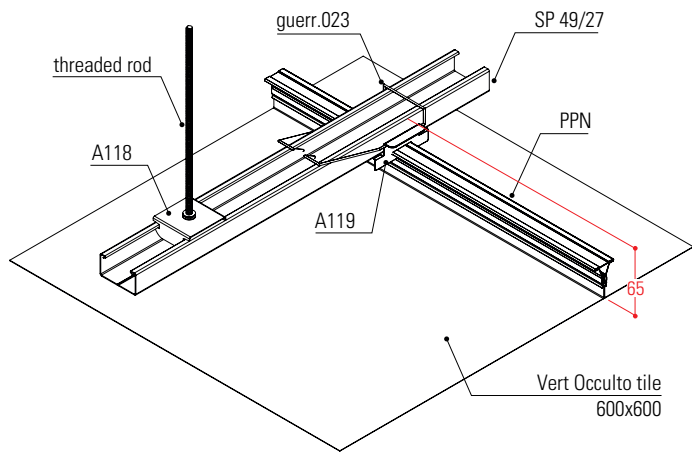

ADVANTAGES AND APPLICATIONS

DESCRIPTION

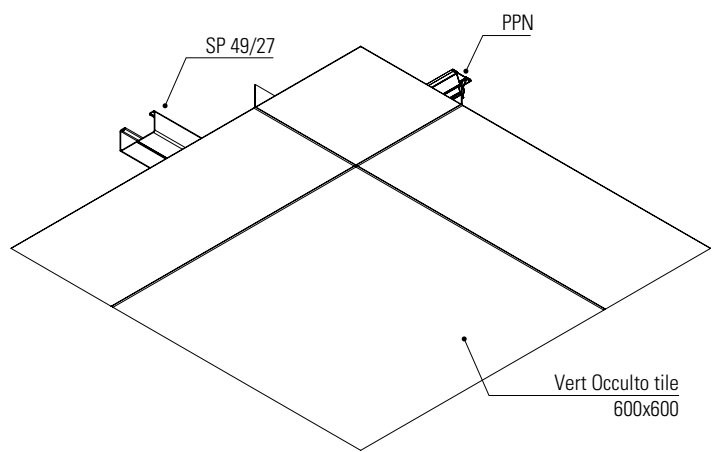

The **Vert Occulto** tile is composed of a membrane and a hidden structure which together form a linear relief effect. The membrane is made up of a metal tile, 28 mm high, with bosses for attachment to the load-bearing structure. The tile is mounted in a double frame with SP 49/27 and supported by brackets mounted on the perimeter band and by rigid suspensions that are individually adjustable.

MODULES AND LIGHTING

CEILING LIGHT GEOMETRY

The **Vert Occulta Led** ceiling light is designed to offer homogeneous, flicker-free lighting suitable for installation in places where excellent visual performance is required.

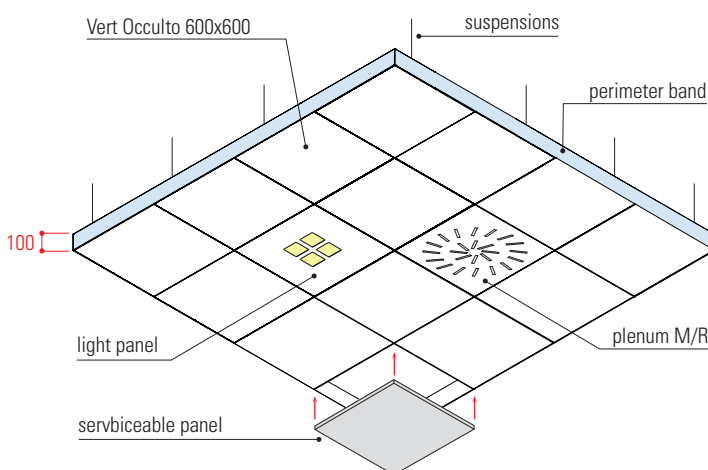

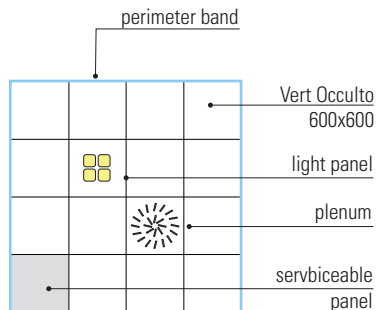

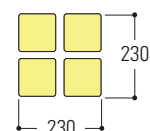

CEILING LIGHT

CUBIC LIGHT PANEL GEOMETRY

This **Light Panel** allows perfect integration into the floating system. It is composed of a covering tile that has the same finish and the same material as the false ceiling. This variant has a geometry with four cubic holes that follows the lines of the false ceiling and the passage of light is in prominence, enhancing the design.

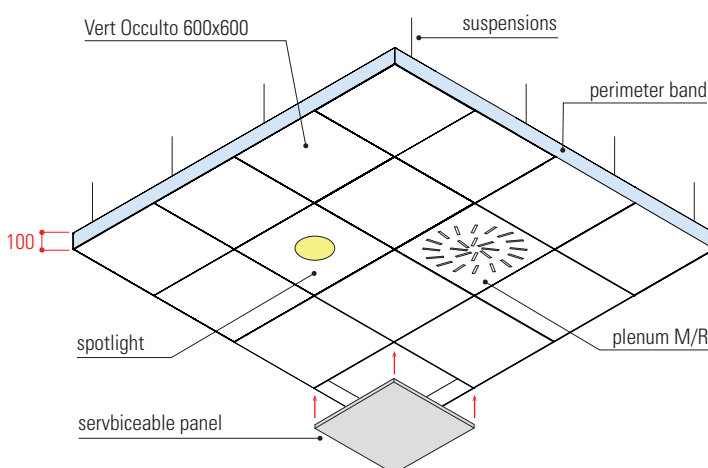

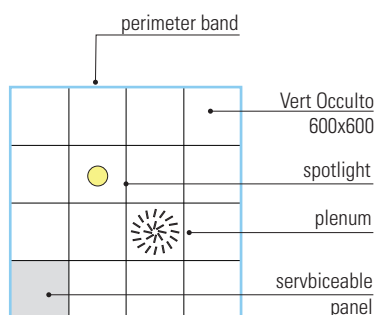

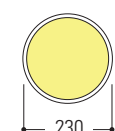

LIGHT PANEL

SPOTLIGHT GEOMETRY

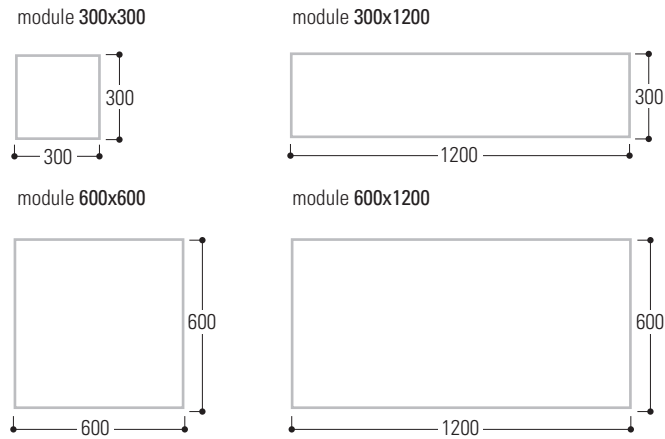

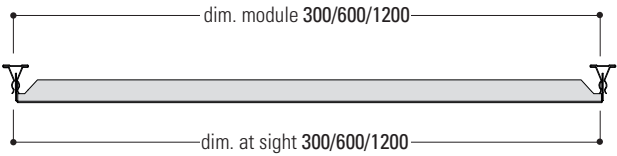

The **LED spotlight** is a recessed device that allows you to obtain uniform and well-distributed light, helping to create welcoming and functional atmospheres in various contexts. They represent a lighting solution modern and efficient that can transform interior environments with style.

SPOTLIGHT

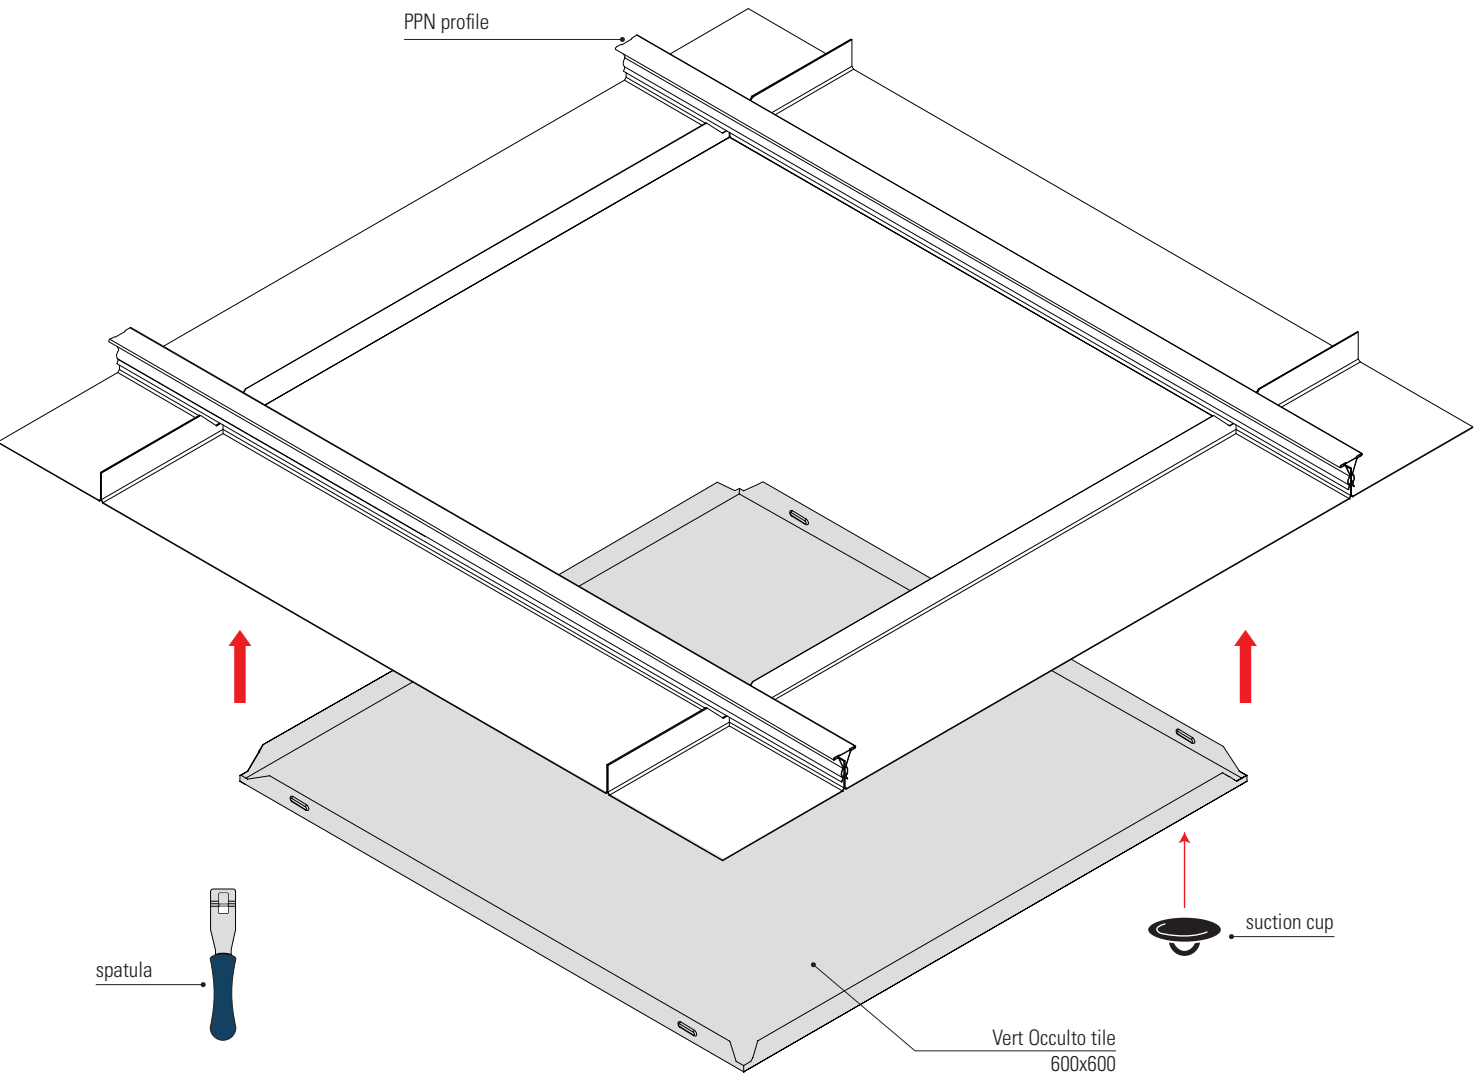

MODULES AND DIMENSIONS

Various solutions are possible; with the possibility of different modules you are able to create the right solution and meet every need.

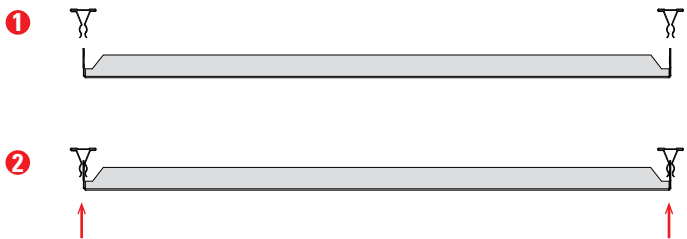

ASSEMBLY

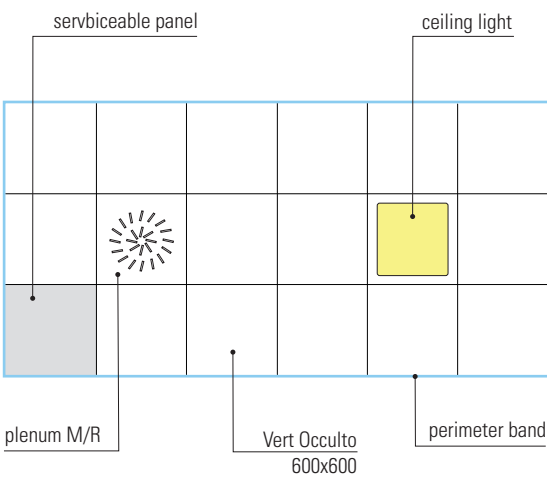

DESCRIPTION

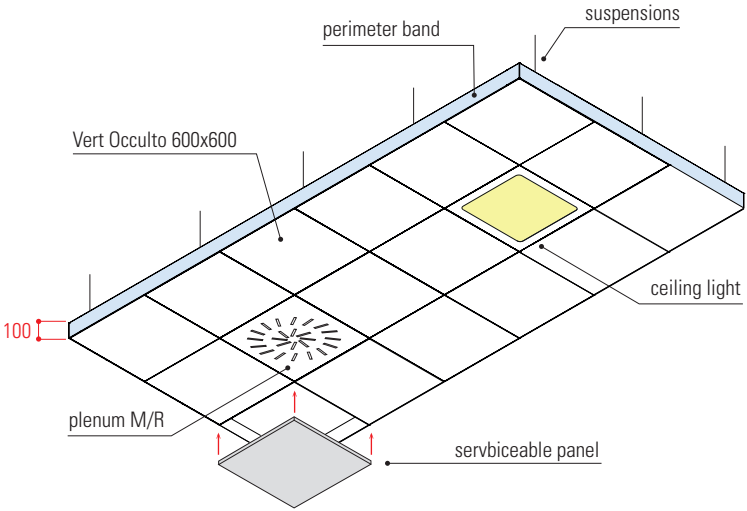

- 1. Position and center the tile between the PPN profiles.
- 2. Apply the tile vertically by inserting it within PPN profiles.
- To access the tile use the suction cup in the corner.
- If the panel is perforated, use the spatula.

PRODUCT STORAGE

Store parcels in covered places with a relatively dry atmosphere and at a temperature as constant as possible, in order to avoid condensation phenomena that may reduce the passivation protecting the galvanised surface. In the case of outdoor storage (not recommended), use a cover that perfectly protects the material against the weather (rain, fog, snow), taking care to place the packages at a slight angle. This cover must in any case be such as to allow adequate ventilation (not putting the two surfaces in direct contact), so that moisture does not accumulate and create condensation.

PACKAGING MATERIAL

The packaging is made of cardboard with plastic bags inside containing the panels, all sealed with tape on the outside. The pallet is made of plastic strapping and wooden laths. The packaging is appropriately sized to facilitate handling in warehouses and construction sites.

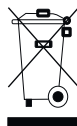

WARNINGS

Important warnings

- Please read the following warnings carefully as they are important instructions for safe installation, use and maintenance.
- After removing the product from its packaging, make sure that it is intact, otherwise contact the seller.
- Packaging elements (plastic bags etc.) must not be left within reach of children as they are potential sources of danger.
- Failure to comply with the above may compromise the safety of the product.
- The manufacturer cannot be held liable for any damage resulting from improper, incorrect and unreasonable use.

Important warnings

- The product must not be subject to modification; any modification voids the warranty and may render the product dangerous.
- Antonio Guerrasio s.r.l. shall not be held liable for any damage caused by its products not being assembled in accordance with the instructions.
- The products must be installed in a workmanlike manner.
- The product is also intended to be installed on normally flammable surfaces.

Recycling

the crossed-out bin serves as a reminder to collect the product separately from other waste at the end of its life or to return it to the retailer when purchasing a new appliance of an equivalent type. This helps to preserve the environment from contamination and promotes the recycling of product components. Unauthorised disposal is subject to sanctions in accordance with the law.

Warning

- All representations in this data sheet are indicative and fixing should be checked when choosing the system to be used.
